Southern Cairngorms

Avalanche Hazard Forecast

Issued 29/01/2022

FOR PERIOD 18:00HRS Sat 29/01/2022 TO 18:00HRS Sun 30/01/2022

THE AVALANCHE HAZARD WILL BE LOW

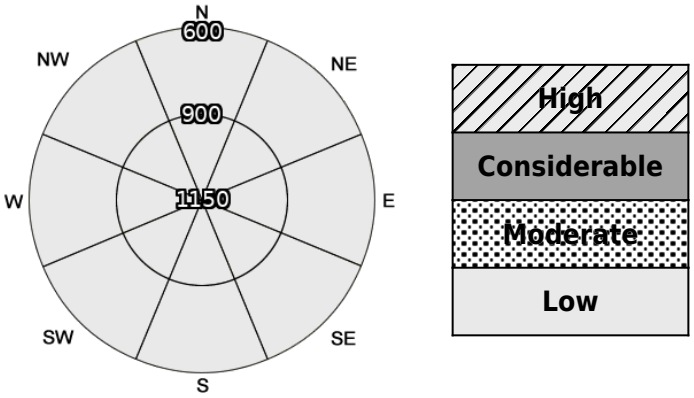
Avalanche Hazard Forecast for Sunday 30/01/2022

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

New snow will mainly fall onto bare ground. Isolated areas of windslab will develop over older snow-ice on North-West to North-East aspects above 900 metres. These areas will be found in steep, wind sheltered terrain such as gully exits, scarp slopes and around corrie rims. Most of these new accumulations will be avoidable. The avalanche hazard will be Low.



Forecast Weather Influences

A return to Wintry conditions with Storm Corrie moving across the area. Winds will ease overnight and start to back to the South, strengthening to gale force during the day. Snowfall from midday falling to all levels.

Comments

Conditions in the hills will remain difficult during Sunday, with blizzards and poor visibility expected in the afternoon. Old snow will be very icy.
