Avalanche Hazard Forecast

**Issued 27/01/2022**

FOR PERIOD 18:00HRS Thu 27/01/2022 TO 18:00HRS Fri 28/01/2022

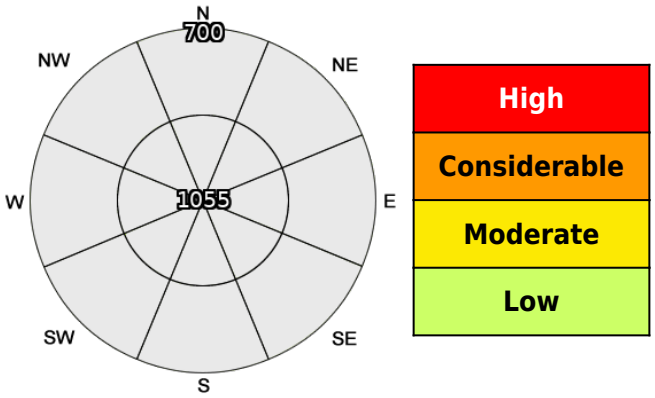
## THE AVALANCHE HAZARD WILL BE LOW

### Avalanche Hazard Forecast for Friday 28/01/2022

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

The few remaining patches of firm old snow will be well bonded and stable, softening slightly as the day progresses. The avalanche hazard will be Low.



#### Forecast Weather Influences

Overnight it will be dry with moderate Westerly winds and the freezing level around 800 metres. During the morning the winds will back South-Westerly becoming gale force as the freezing level rises well above the summits. Showers, heaviest around midday will fall as rain at all levels.

#### Comments

Here in Torridon we are close to a 'no snow' situation.
