Northern Cairngorms

Avalanche Hazard Forecast

Issued 28/02/2022

FOR PERIOD 18:00HRS Mon 28/02/2022 TO 18:00HRS Tue 01/03/2022

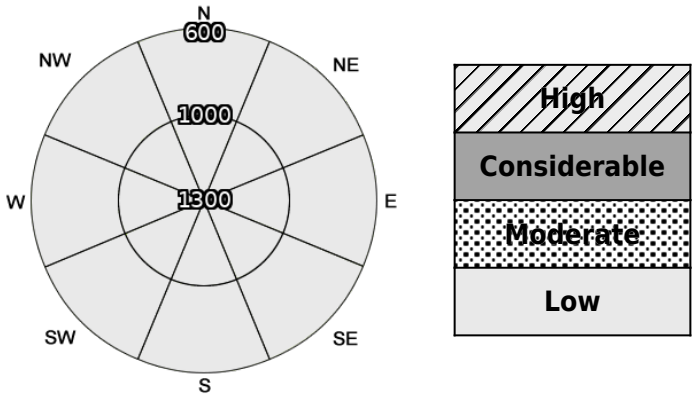
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 01/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to consolidate in the colder overnight temperatures and be generally well bonded and stable throughout. Isolated wet surface instabilities will develop on steep, sun exposed slopes, below 900 metres where the snowpack will remain moist. The avalanche hazard will be Low.



Forecast Weather Influences

Moderate to strong Westerly winds overnight will ease during the forecast period as an area of high pressure builds. Largely dry with the 600 metre freezing level rising to 900 metres during the afternoon.

Comments

A period of high pressure giving a welcome break from the strong winds.
