Issued 31/03/2022

FOR PERIOD 18:00HRS Thu 31/03/2022 TO 18:00HRS Fri 01/04/2022

THE AVALANCHE HAZARD WILL BE MODERATE

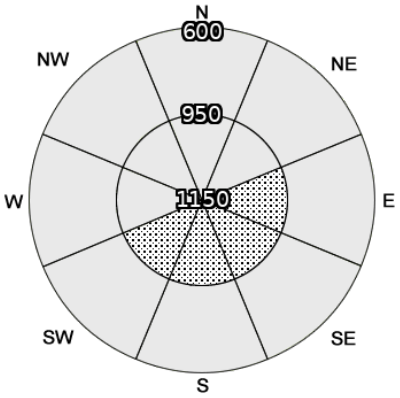
Avalanche Hazard Forecast for Friday 01/04/2022

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Areas of moderately bonded windslab will be found on wind sheltered East through South to South-West aspects above 950 metres. Greatest hazard will be found on steep terrain around corrie rims and gully tops mainly on the highest hills along the Northern boundary of the forecast area. Elsewhere, occasional drifts at lower levels with older snow very hard and icy. The avalanche hazard will be Moderate.



Forecast Weather Influences

There will be further light snow showers at all levels, some overnight but mostly during the afternoon. Winds will remain strong Northerlies overnight but backing and easing during the day to give a gentle breeze from the West.

Comments

Older snow is very firm and icy. Caution required in places.
