Issued 26/02/2022

FOR PERIOD 18:00HRS Sat 26/02/2022 TO 18:00HRS Sun 27/02/2022

THE AVALANCHE HAZARD WILL BE MODERATE

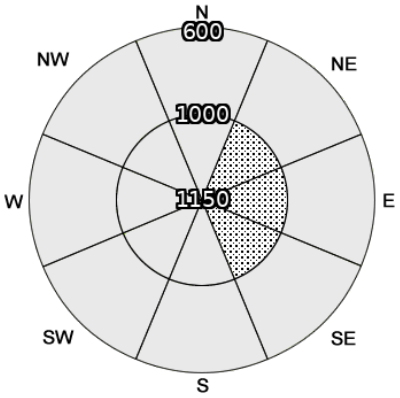
Avalanche Hazard Forecast for Sunday 27/02/2022

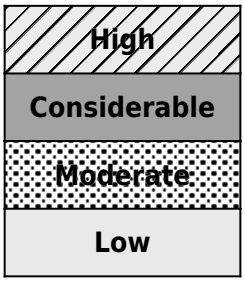
Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The vast majority of the snowpack will be well bonded and stable. Localised accumulations of moderately well bonded snow will be encountered in a few steeper, wind sheltered locations on North-East to South-East aspects above 1000 metres. The avalanche hazard will be Moderate.





Forecast Weather Influences

No precipitation has been forecast. Storm force Southerly winds, easing slightly overnight, before increasing to gale force by the end of the afternoon. Freezing level lowering to around 650 metres by morning, gradually rising to 900 metres later.

Comments

Wet snow will become firm and icy as it refreezes.
