Southern Cairngorms

Avalanche Hazard Forecast

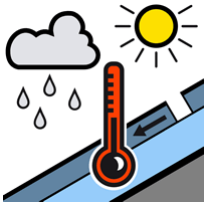
Issued 28/02/2022

FOR PERIOD 18:00HRS Mon 28/02/2022 TO 18:00HRS Tue 01/03/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 01/03/2022

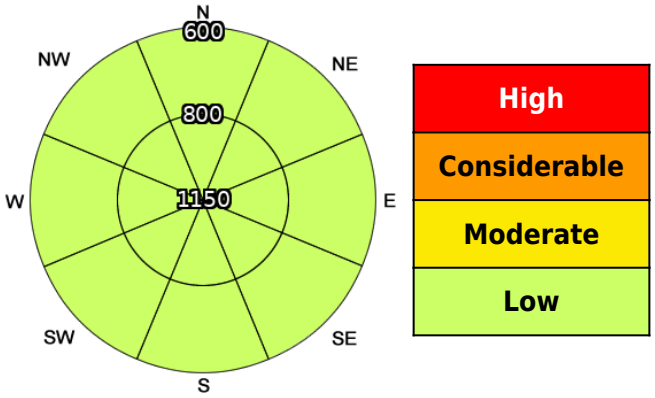
Avalanche Problems



Wet Snow

Forecast Snow Stability & Avalanche Hazard

The snow cover will initially be firm and generally well bonded throughout. Surface instabilities may be possible on steep slopes exposed to the sun. Most aspects will have good cover above 800 metres with greatest amounts found on North through East to South-East aspects above 800 metres. The avalanche hazard will be Low.



Forecast Weather Influences

Dry throughout this period. The freezing level will be around 600 metres overnight, rising to around 900 metres by the end of the afternoon. Winds will be from the West to West-North-West, initially strong but easing throughout the day.

Comments

Generally good snow cover above 800 metres although ground has started to break through.
