Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Fri 25/03/2022 TO 18:00HRS Sat 26/03/2022

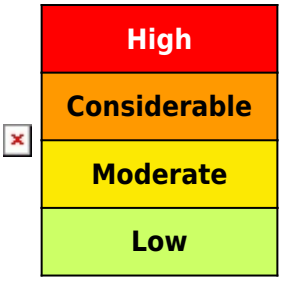
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 26/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change expected. The slowly thawing patchy spring snowpack will be generally well bonded and stable throughout. Although the snow surface will remain soft in most locations, it will be firmer on steep shaded North and North-West aspects, particularly around summit levels. The avalanche hazard will be Low.



Forecast Weather Influences

It will be a dry day with broken cloud and good sunny periods. The wind will be light and variable overnight, becoming a moderate Westerly through the day. It will be mild with the freezing level remaining well above the highest summits.

Comments

Staying dry and often sunny on Sunday and Monday, though a little cloudier at times.
