Southern Cairngorms

Avalanche Hazard Forecast

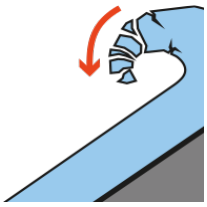
Issued 25/03/2022

FOR PERIOD 18:00HRS Fri 25/03/2022 TO 18:00HRS Sat 26/03/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 26/03/2022

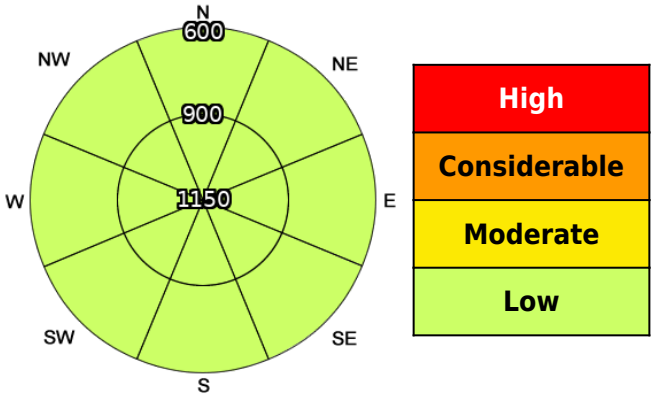
Avalanche Problems



Cornices

Forecast Snow Stability & Avalanche Hazard

The snow will continue to thaw and diminish but will remain generally well bonded and demonstrate good stability. Falling ice and cornice collapse will remain a potential hazard. Greatest snow accumulations will be on high plateau areas and in North to East facing corries above 900 metres. The avalanche hazard will be Low.



Forecast Weather Influences

Another dry and sunny day is expected. Freezing levels will remain above the summits. Winds will be light, initially South, veering West during the day.

Comments

Dry and sunny conditions continuing. Cornice collapse and falling ice will remain a potential hazard in the mild temperatures.
