Torridon

Avalanche Hazard Forecast

Issued 27/03/2022

FOR PERIOD 18:00HRS Sun 27/03/2022 TO 18:00HRS Mon 28/03/2022

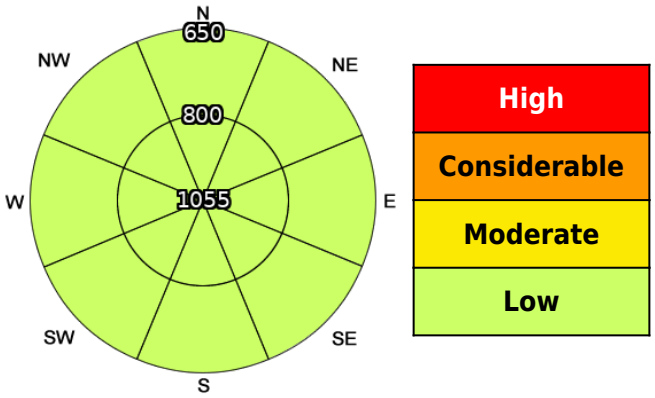
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 28/03/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Any remaining snow patches will firm up overnight before softening during the day. This slowing thawing snowpack will remain stable and well bonded. Most snow can be found on North through East to South-East aspects above 800 metres. Limited cover below this height. The avalanche hazard will be Low.



Forecast Weather Influences

Following a possible overnight frost it will remain dry and settled with long sunny periods. Light winds from the South-West will veer to become North-West. Freezing levels will remain above summit height.

Comments

A cold evening with another warm day tomorrow. A return to much colder weather from Tuesday.
