Glencoe

Avalanche Hazard Forecast

Issued 08/04/2010

FOR PERIOD 18:00HRS Thu 08/04/2010 TO 18:00HRS Fri 09/04/2010

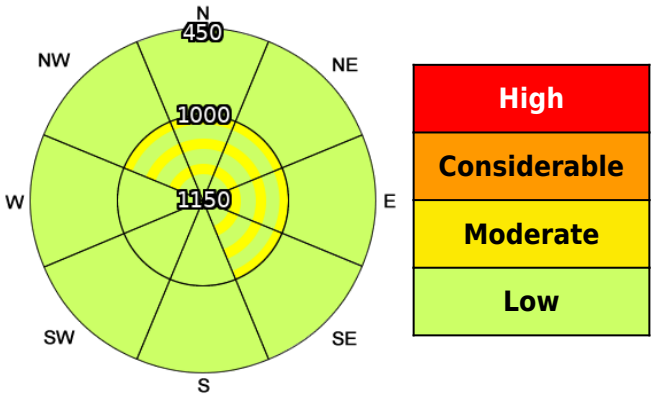
THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Friday 09/04/2010

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Mild conditions will maintain a generally soft and moist snowpack at all levels. Stability will be good in most areas but potential weaknesses will exist on the very steepest slopes, in particular corniced areas, summit gully exiits and wherever creep lines are evident in the snowpack. The avalanche hazard will be Moderate.



Forecast Weather Influences

There will be light showers of rain with fresh winds initially from the West backing to the South-West becoming moderate. Freezing levels will remain above the summits.

Comments

Cornices will remain prone to collapse.
