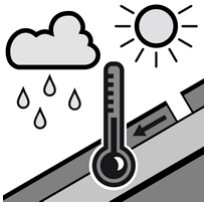
Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sat 02/04/2022 TO 18:00HRS Sun 03/04/2022

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Sunday 03/04/2022

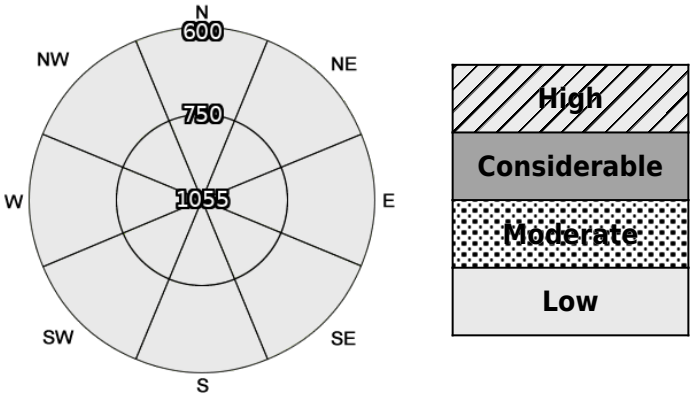
Avalanche Problems



Wet Snow

Forecast Snow Stability & Avalanche Hazard

The snowpack will thaw at all levels through the afternoon, becoming wet throughout, with minor wet snow instabilities affecting deeper areas of recent snow in steep North to East aspects above 750 metres. The patchy old snow will soften at the surface, but will generally remain firm, well bonded and stable. The avalanche hazard will be Low.



Forecast Weather Influences

It will be dry overnight and early morning before heavy rain at all levels, preceded by sleet and snow, arrives late afternoon. Light North winds will gradually back South-West by dawn and strengthen to gale force by the afternoon. The freezing level will rise from around 700 metres to well above the summits in the afternoon.

Comments

Baton the hatches! Expect a mild, wet and very windy period. Becoming colder again Tuesday with some snow on the hills.
