Avalanche Hazard Forecast

Issued 22/12/2023

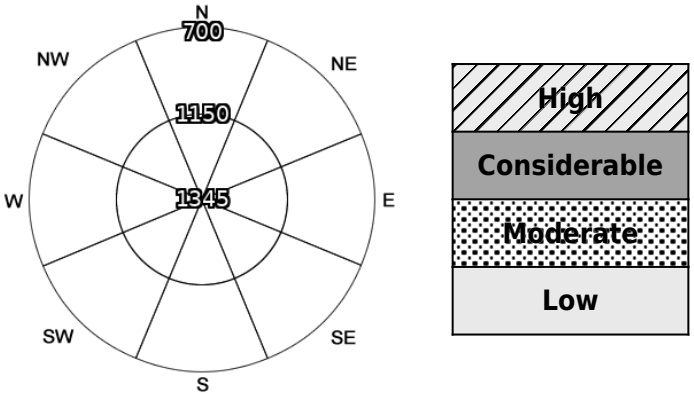
FOR PERIOD 18:00HRS Fri 22/12/2023 TO 18:00HRS Sat 23/12/2023

Avalanche Hazard Forecast for Saturday 23/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard and avalanche reports will not be issued for this area until the situation changes. Go to the blog for area photos and general information which is being provided by SAIS forecasters on a daily basis.



Forecast Weather Influences

Gale force Westerly winds. Precipitation throughout the period falling as snow on the highest summits in the evening then rain at all levels. The freezing level will rise to well above the summits in the evening.

Comments

A dusting of fresh snow above around 1100 metres, this will thaw overnight and during tomorrow.
