Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Wed 13/04/2022 TO 18:00HRS Thu 14/04/2022

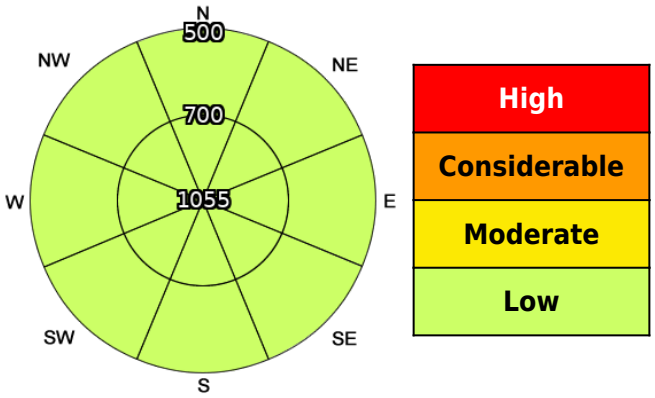
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 14/04/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change. The patchy, moist and soft snowpack will have good stability generally and will continue to slowly thaw at all levels and locations, Where exposed at higher elevations, the old snow will be firmer. Any remaining cornices will be soft and fragile. The avalanche hazard will be Low.



Forecast Weather Influences

Extensive mist and low cloud with patchy drizzle possible overnight and morning, but likely brighten later in the day. Mostly light southerly winds, freshening on the tops during the day. Mild, with freezing level remaining well above the summits.

Comments

Into the weekend, it will remain largely dry and cloudy with patchy drizzle at times. Little change to the snowpack stability expected.
