Torridon

Avalanche Hazard Forecast

Issued 05/01/2024

FOR PERIOD 18:00HRS Fri 05/01/2024 TO 18:00HRS Sat 06/01/2024

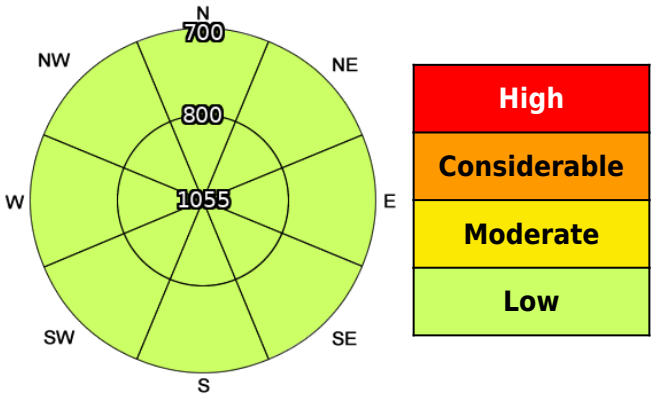
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 06/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There will be a further dusting of new snow above around 800 metres. Accumulations gaining depth are not expected to be extensive. The patchy older snowpack, which lies mainly on South-West through West to North aspects above 800 metres will generally be stable and its surface re-frozen. Greatest amounts will be present in gullies, around coire rims, below steep banks and along ridge flanks. The avalanche hazard will be Low.



Forecast Weather Influences

Winds will be moderate Westerly. Light showers are expected throughout the period, falling as snow above around 700 metres. The freezing level will be around 800 metres.

Comments

High pressure is building.
