Avalanche Hazard Forecast

Issued 17/04/2022

FOR PERIOD 18:00HRS Sun 17/04/2022 TO 18:00HRS Mon 18/04/2022

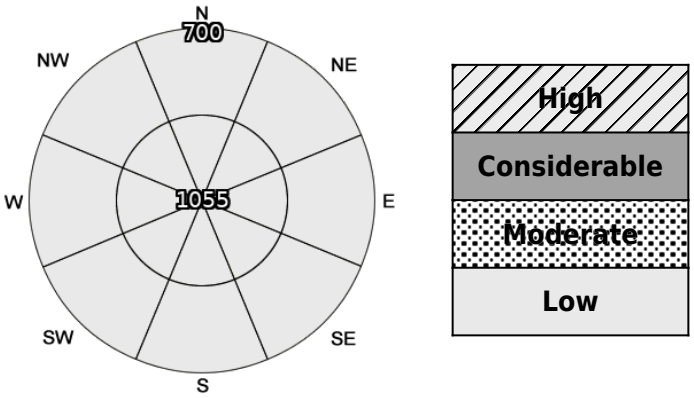
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 18/04/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The thawing snowpack will be limited, patchy and stable throughout, refreezing at highest summit levels. Largest snow patches will linger on steep North to East aspects above 750 metres. A dusting of fresh summit snow is possible through the day, but will not be significant. The avalanche hazard will be Low.



Forecast Weather Influences

Overnight rain will ease early morning, with a little summit sleet and snow possible as the freezing level lowers to around 950 metres by dawn. The wind will be a moderate Southerly overnight, veering South-West and freshening through the day.

Comments

Little change is expected into next week.
This is the last forecast for this season.
