Avalanche Hazard Forecast

Issued 17/04/2022

FOR PERIOD 18:00HRS Sun 17/04/2022 TO 18:00HRS Mon 18/04/2022

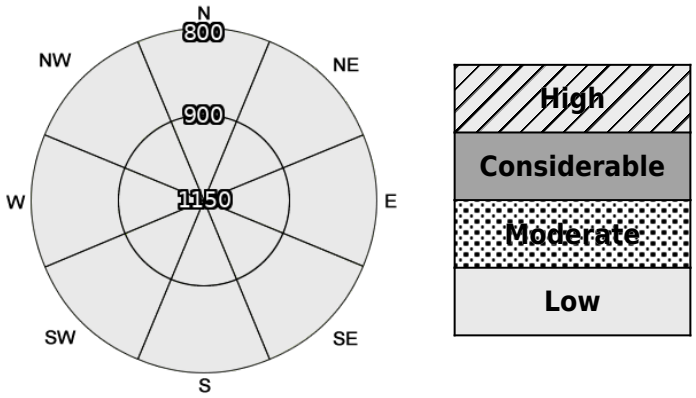
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 18/04/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

New snow amounts are not expected to be deep or extensive mainly a dusting over the highest summits. The old moist snowpack will consolidate and stability will be generally good. Snow amounts will remain limited in extent mainly on North through to Easterly aspects above 900 metres. The avalanche hazard will be Low



Forecast Weather Influences

Easter Monday; After some overnight rain at all levels the freezing level will lower to around 1000 metres. During the day occasional wintry showers falling as light snow above 900 metres with mostly rain below this elevation. Southerly winds will be strong veering to become South-Westerly.

Comments

Cooler tomorrow. Last SAIS report for this season. Reports will resume in December. Have a great summer.
