THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Thursday 05/03/2020

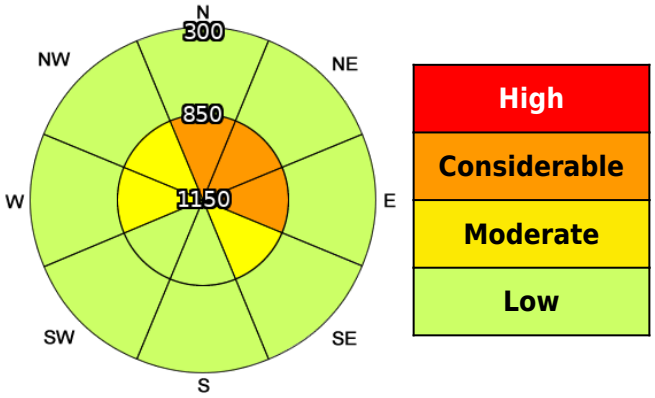
Avalanche Problems

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

New snow accumulations are not expected to be significant. However, localised areas of unstable windslab will persist, mainly at the tops of steep North, North-East and Easterly aspects above 850 metres. Large areas of moderately bonded snow will be present on similar aspects. Any old snow exposed to the winds will be frozen and stable. Cornices remain fragile and unstable. The avalanche hazard will be Considerable.



Forecast Weather Influences

Overnight, dry conditions with the freezing level at around 500 metres. During the day light to moderate Southerly winds with some light snow showers above 400 metres.

Comments

Looks like another relatively dry day tomorrow.
