Glencoe

Avalanche Hazard Forecast

Issued 13/03/2020

FOR PERIOD 18:00HRS Fri 13/03/2020 TO 18:00HRS Sat 14/03/2020

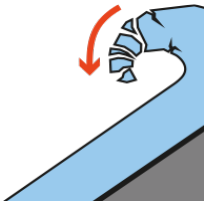
THE AVALANCHE HAZARD WILL BE CONSIDERABLE

Avalanche Hazard Forecast for Saturday 14/03/2020

Avalanche Problems

Wind Slab

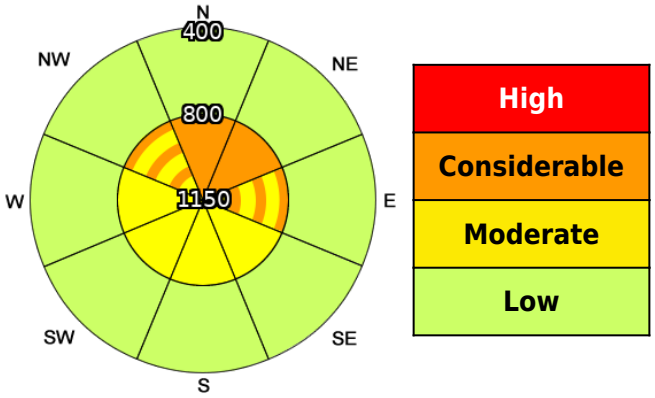
Wet Snow



Cornices

Forecast Snow Stability & Avalanche Hazard

Areas of windslab of varying age and stability will be found on many North-West through North to East aspects above 800 metres. The stability of this will decrease as the freezing level rises and it becomes wet. Cornices will be prone to collapse. The avalanche hazard will be Considerable.



Forecast Weather Influences

A band of snow will cross the area during the night. Through the day the freezing level will rise to around 1000 metres. There will be some precipitation which will fall as snow on the tops and rain at lower levels. Strong South-Easterly winds will veer to the South.

Comments

After a brief clear settled day a return to normal weather (ie unsettled) expected for the weekend.
