Glencoe

Avalanche Hazard Forecast

Issued 14/03/2020

FOR PERIOD 18:00HRS Sat 14/03/2020 TO 18:00HRS Sun 15/03/2020

THE AVALANCHE HAZARD WILL BE MODERATE

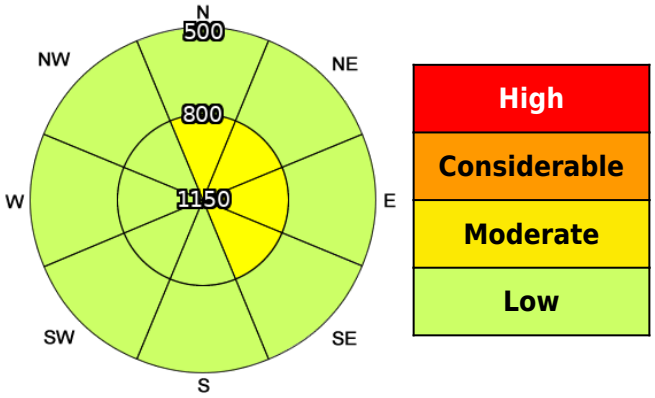
Avalanche Hazard Forecast for Sunday 15/03/2020

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The existing wet snowpack will consolidate and stabilise as the freezing level falls. Fresh areas of windslab will be deposited on mainly North through East to South-East aspects above 800 metres. These areas are not expected to be particularly extensive or deep with the tops of slopes and gullies being most affected. The avalanche hazard will be Moderate.



Forecast Weather Influences

The freezing level will drop from above the summits to around 800 metres. Strong winds will veer from the South to the North-West and ease slightly. There will be some showers which will fall as snow above around 700 metres

Comments

Still good snow cover at higher levels in Glen Coe despite the milder conditions today.
