Avalanche Hazard Forecast

Issued 20/12/2023

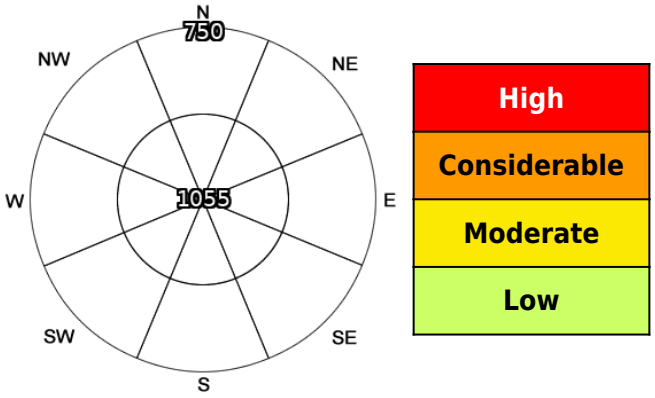
FOR PERIOD 18:00HRS Wed 20/12/2023 TO 18:00HRS Thu 21/12/2023

Avalanche Hazard Forecast for Thursday 21/12/2023

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Currently there is insufficient snow cover to present any avalanche hazard, therefore avalanche reports will not be issued for this area. Refer to the Torridon Blog and Mountain Information for details which will be provided by SAIS forecasters on a daily basis.



Forecast Weather Influences

Mild with heavy rain overnight. Precipitation becoming showery during the day and gradually turning to snow above 600 metres as the freezing level lowers. Storm force Westerly winds overnight will veer West-North-Westerly and ease slightly during the day.

Comments

Any new snow accumulations are not expected to be significant.
