Southern Cairngorms

Avalanche Hazard Forecast

Issued 28/01/2022

FOR PERIOD 18:00HRS Fri 28/01/2022 TO 18:00HRS Sat 29/01/2022

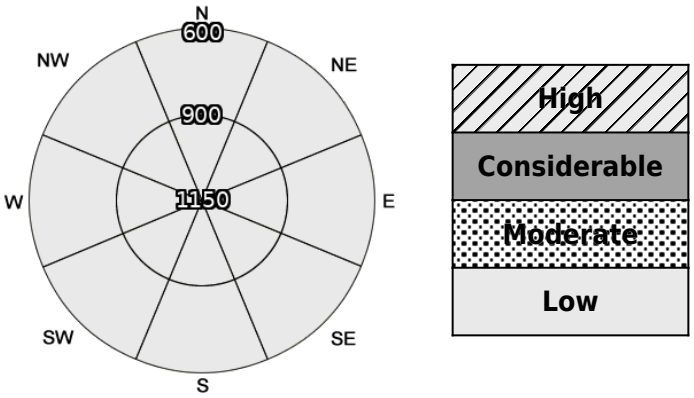

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 29/01/2022

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Surface layers of the remaining patchy snow will become firm and icy as the freezing level lowers during the day. Shallow and inconsequential accumulations of windslab will form in very wind sheltered locations only on generally East to South aspects. The avalanche hazard will be Low.

Forecast Weather Influences

Light rain or drizzle overnight will turn to sleet and then light snow showers just after daybreak. These showers will be driven on by storm force Westerly winds, gradually easing to gale force North-Westerlies. Mild overnight, becoming cooler during daylight hours with the freezing level lowering to around 600 metres by midday.

Comments

High wind speeds creating serious mountain conditions on Saturday.
