Avalanche Hazard Forecast

Issued 29/12/2023

FOR PERIOD 18:00HRS Fri 29/12/2023 TO 18:00HRS Sat 30/12/2023

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 30/12/2023

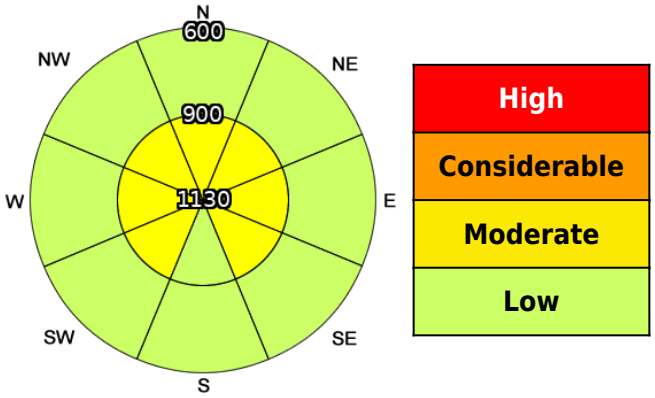
Avalanche Problems

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

Weak windslab will persist on steep North through East to South-East aspects above 900m until midday. During the morning new accumulations of poorly bonded windslab will begin to form on sheltered South-West through West to North-West aspects above 900m. The snowpack in all other areas and altitudes will remain crusty and well bonded. The avalanche hazard will be Moderate.



Forecast Weather Influences

Dry, cold conditions overnight with generally light winds. Light snow showers commencing mid morning carried on much stronger East-South-East winds.

Comments

Early hazard mainly on NE to SE aspects. Avalanche hazard expected to transition to SW through W to NW aspects later after stronger ESE winds commence during the morning.
