Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 31/12/2023 TO 18:00HRS Mon 01/01/2024

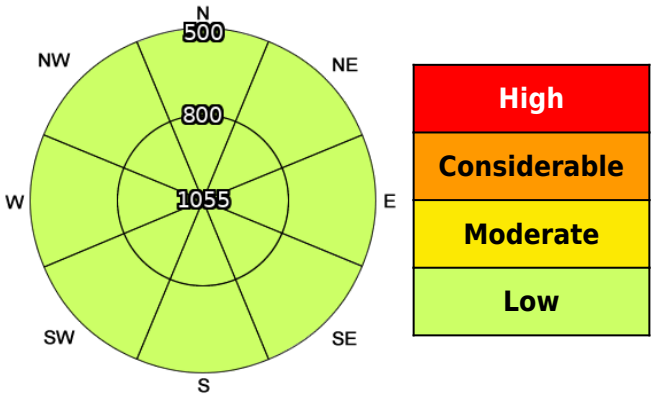
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 01/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

There will be an overall shallow covering of snow largely above 500 to 600 metres with generally good stability throughout. However, minor weaknesses will persist in pockets of windslab that have accumulated in steep and very steep terrain mostly above 800 metres on West to North aspects, affecting tops of gullies, ridge flanks and coire rims. The avalanche hazard will be Low.



Forecast Weather Influences

It will be a largely dry day but with the possibility of summit cloud and the odd brief light snow shower. Light Southerly winds in the evening will gradually freshen throughout the period. The freezing level will fluctuate around 800 metres.

Comments

Good winter conditions expected tomorrow. High windchill at summit levels.
