Avalanche Hazard Forecast

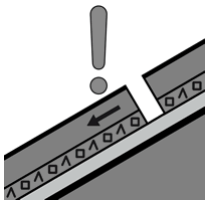
FOR PERIOD 18:00HRS Wed 03/01/2024 TO 18:00HRS Thu 04/01/2024

THE AVALANCHE HAZARD WILL BE MODERATE

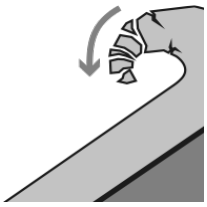
Avalanche Hazard Forecast for Thursday 04/01/2024

Avalanche Problems

Wind Slab



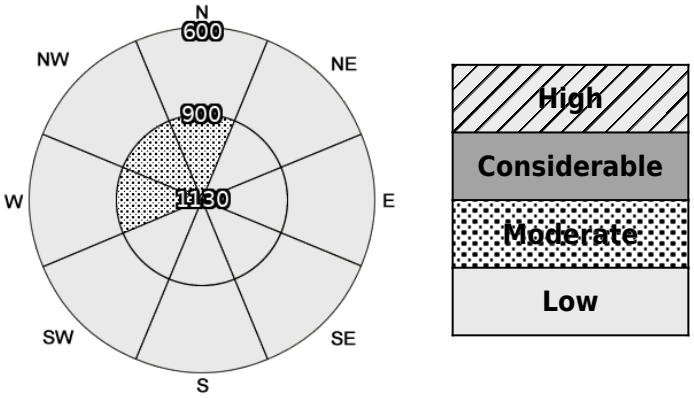
Persistent Weak Layers



Cornices

Forecast Snow Stability & Avalanche Hazard

Localised new accumulations of moderately bonded windslab on steep West to Northerly aspects above 900m. Most affected areas will be gully tops and coire rims. Some limited wet snow instability possible at lower altitudes on very steep ground on the same aspects. The avalanche hazard will be Moderate.



Forecast Weather Influences

Overnight precipitation falling as snow or sleet over summits and rain at lower levels. Freezing just below summits. Moderate South-Easterly airflow easing to light Southerly later.

Comments

Freezing level close to summits throughout the forecast period.
