Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Thu 04/01/2024 TO 18:00HRS Fri 05/01/2024

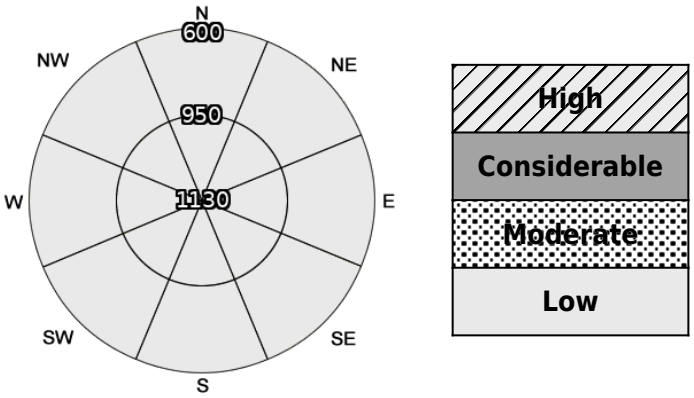
## THE AVALANCHE HAZARD WILL BE LOW

### Avalanche Hazard Forecast for Friday 05/01/2024

#### Avalanche Problems

#### Forecast Snow Stability & Avalanche Hazard

A little new soft windslab expected on steep North to East aspects above 950m. New build up expected to be thin, limited in extent and confined to gully exits and coire rims. The surface of the old moist snowpack will freeze and become crusty and well bonded by the end of the day. The avalanche hazard will be Low.



#### Forecast Weather Influences

Progressively cooler temperatures. Dry overnight then a few light snow showers on light to moderate South-West, later Westerly winds.

#### Comments

Crust developing in many locations by the end of Friday.
