Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Mon 08/01/2024 TO 18:00HRS Tue 09/01/2024

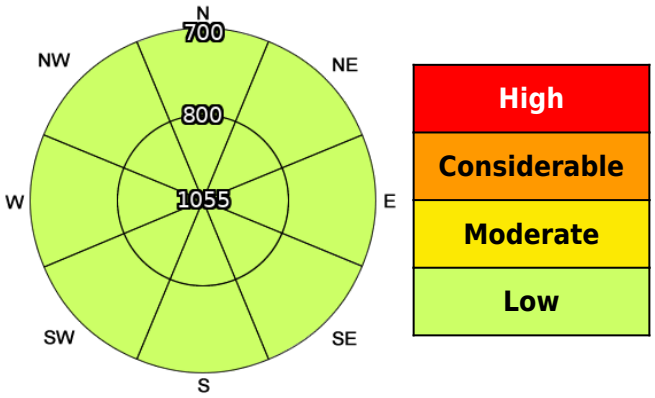
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 09/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected in the snowpack. There will be a thin layer of recent snow on all aspects above around 750 metres. Some windslab will persist, mainly on North-East through East to South aspects above 850 metres. Accumulations having gained depth are mainly localised. The old snowpack, which lies mainly above 800 metres, will be generally stable and it's surface refrozen. The avalanche hazard will be Low.



Forecast Weather Influences

Winds will be light generally East-South-Easterly. It will be clear and dry. After an overnight frost at all levels the freezing level will be around 800 metres.

Comments

High pressure will dominate giving clear dry settled conditions.
