Avalanche Hazard Forecast

Issued 10/01/2024

FOR PERIOD 18:00HRS Wed 10/01/2024 TO 18:00HRS Thu 11/01/2024

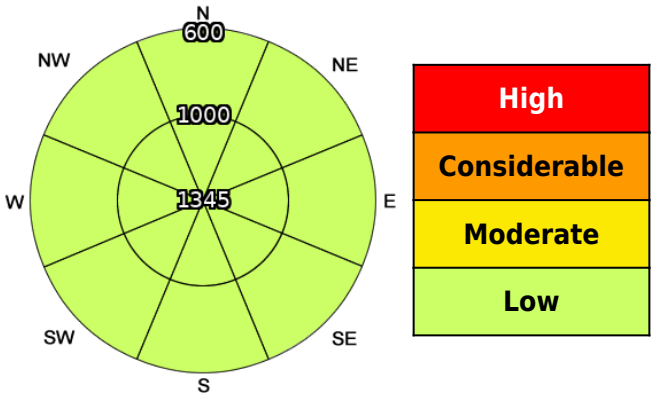
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Thursday 11/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. The snowpack will remain generally stable. Some localised accumulations of unstable windslab will be present, mainly on West through North to East aspects above 1000 metres, at the tops of gullies and around core rims. The avalanche hazard will be Low.



Forecast Weather Influences

The wind will initially be moderate to strong East-North-Easterly, easing overnight to be light and variable through the day. It is expected to remain dry and freezing at most levels due to inversion conditions.

Comments

Remaining cold and dry.
