Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sat 13/01/2024 TO 18:00HRS Sun 14/01/2024

THE AVALANCHE HAZARD WILL BE MODERATE

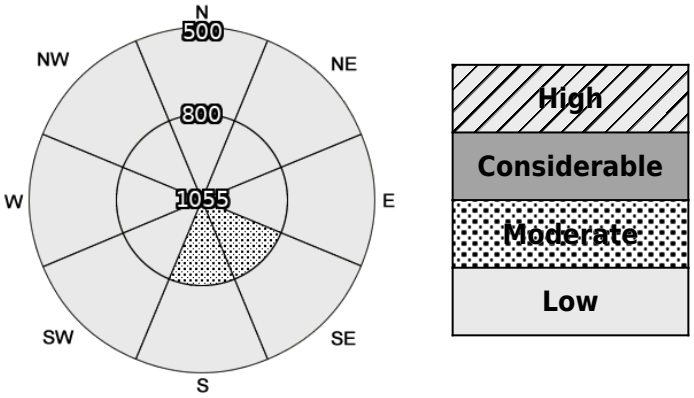
Avalanche Hazard Forecast for Sunday 14/01/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will remain well bonded and stable in all locations. Localised areas of windslab will develop gradually through the day, with South and South-East aspects above 800 metres most affected. Accumulations are not expected to be extensive and mostly affect steep wind sheltrered areas such as gully tops and coire rims. The avalanche hazard will be Moderate.



Forecast Weather Influences

Becoming colder with the freezing level falling to around 200 metres with strong North-Westerly winds. Showers from early morning will fall as snow at most levels.

Comments

More snow forecast for coastal mountains than further inland. Remaining cold with further snowfall on Monday and Tuesday.
