Avalanche Hazard Forecast

Issued 14/01/2024

FOR PERIOD 18:00HRS Sun 14/01/2024 TO 18:00HRS Mon 15/01/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 15/01/2024

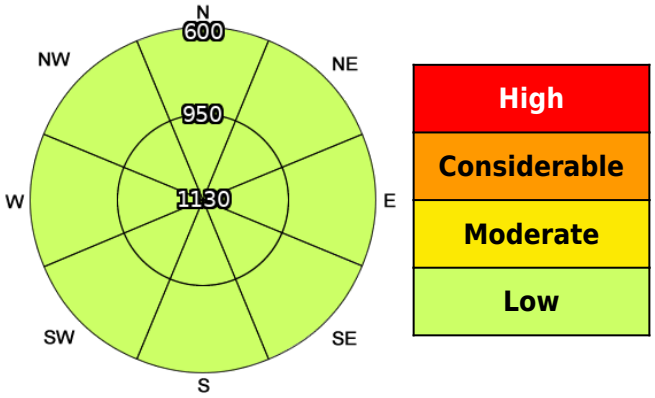
Avalanche Problems

Wind Slab

Cornices

Forecast Snow Stability & Avalanche Hazard

All wind scoured locations will remain firm or crusty and well stabilized. Weak windslab will be present on very steep South-East through South to South-West aspects above 950m. Selected multi aspect East facing gully exits may also be affected by cross loading eg. on the Post Face of Coire Ardair. New accumulations not expected to be deep or extensive but tending to be localised in distribution. The avalanche hazard will be Low.



Forecast Weather Influences

Becoming very cold. Moderate to strong North-West winds easing a little later. Only a few sporadic light snow showers are forecast.

Comments

Low hazard does not mean no hazard. Check the avalanche hazard scale for an explanation.
