Avalanche Hazard Forecast

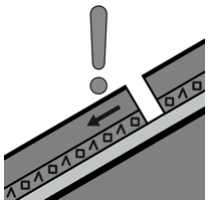
FOR PERIOD 18:00HRS Thu 18/01/2024 TO 18:00HRS Fri 19/01/2024

THE AVALANCHE HAZARD WILL BE CONSIDERABLE

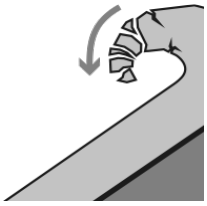
Avalanche Hazard Forecast for Friday 19/01/2024

Avalanche Problems

Wind Slab



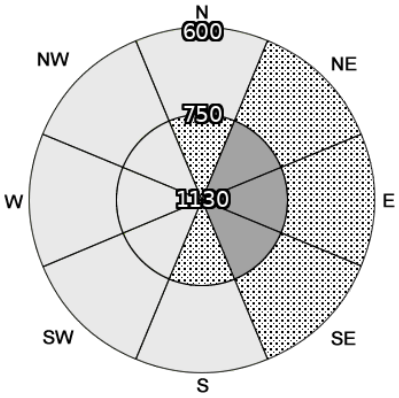
Persistent Weak Layers

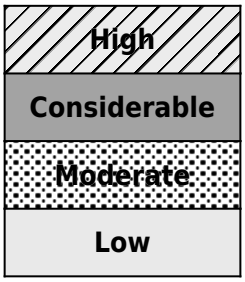


Cornices

Forecast Snow Stability & Avalanche Hazard

Rapid build up of weakly stabilized windslab expected on steep North-East to South-East aspects above 750 metres, where avalanches are likely. Windslab will also be present on North and South aspects above 750 metres. Weak collapse prone cornices will overhang many of these locations. Better stability on ridges and recently wind scoured aspects. The avalanche hazard will be Considerable.





Forecast Weather Influences

Snow showers throughout, occasionally heavy. Moderate to strong West-South-West winds. Cold summit temperatures. Freezing level rising to 600 metres later.

Comments

Careful route choice required. Best stability on ridges and wind scoured slopes.
