Avalanche Hazard Forecast

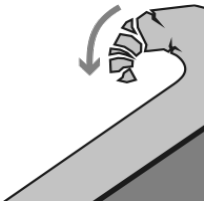
FOR PERIOD 18:00HRS Wed 27/03/2024 TO 18:00HRS Thu 28/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Thursday 28/03/2024

Avalanche Problems

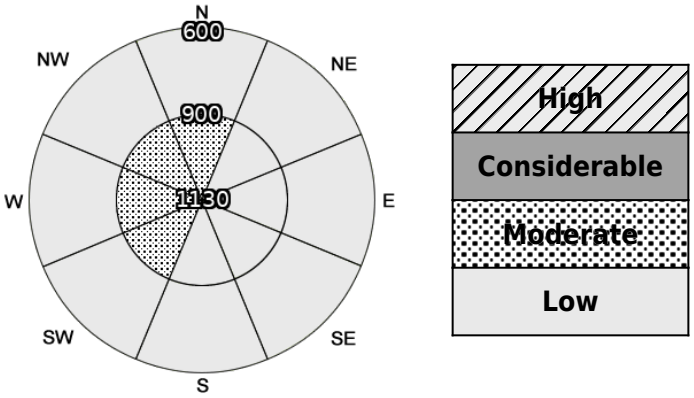
Wind Slab



Cornices

Forecast Snow Stability & Avalanche Hazard

Fresh unstable windslab will continue to build in wind sheltered locations, primarily on South-West through West to North aspects above 900 metres. Areas most affected will be coire rims and gully tops. Fragile cornices will continue to develop above the same aspects. Generally good stability elsewhere. The avalanche hazard will be Moderate.



Forecast Weather Influences

Scattered showers are expected overnight, falling as snow above around 800 metres. Strong South-Easterly winds initially, then backing East during the early hours. The freezing level will drop to 600 metres during the night, then rise steadily to around 1000 metres.

Comments

Remaining showery through Friday and Saturday with summit snow expected.
