Avalanche Hazard Forecast

Issued 28/03/2024

FOR PERIOD 18:00HRS Thu 28/03/2024 TO 18:00HRS Fri 29/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

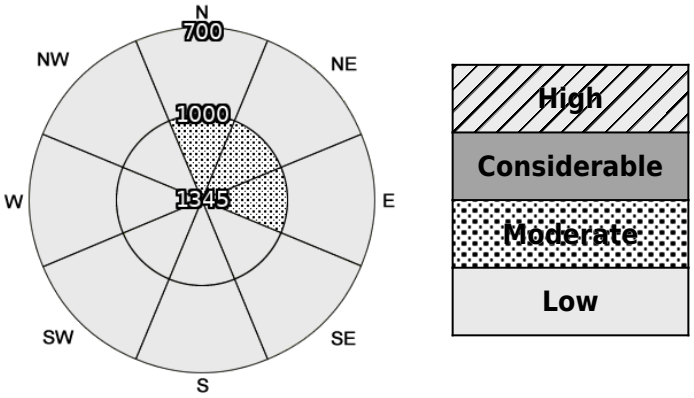
Avalanche Hazard Forecast for Friday 29/03/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to slowly consolidate. However, some areas of moderately bonded windslab will remain, particularly where the more recent deposits overlie the old firm icy snowpack. These areas will tend to be on North to East aspects above 1000 metres. On other aspects the snowpack will be shallower, and stability will be better. The avalanche hazard will be Moderate.



Forecast Weather Influences

It will remain cloudy with some light snow showers possible. The freezing level will be around 1000 metres. Easterly winds overnight will ease, and strengthen again from the South-West during the day.

Comments

Weather hopefully improving a bit for the Easter Weekend.
