

THE AVALANCHE HAZARD WILL BE MODERATE
Avalanche Hazard Forecast for Monday 07/02/2022
Avalanche Problems

Wind Slab

Wet Snow

Cornices
Forecast Snow Stability & Avalanche Hazard

Through the day, as temperatures rise, a brief period of increased instability will affect existing areas of windslab. Steep, sheltered locations such as gullies, coire rims and ridge flanks on mainly North through East to South aspects above 700 metres will be most affected. Cornices will be prone to collapse. The avalanche hazard will be Moderate.

Forecast Weather Influences

A mainly dry night will be followed by some light snow showers during the morning, turning to rain at all levels by midday. The freezing level will be around 500 metres overnight, rising above the summits mid-morning. Moderate West-North-Westerly winds overnight will back South-Westerly by morning and increase in strength to strong by midday.

Comments

Colder again from Tuesday.
