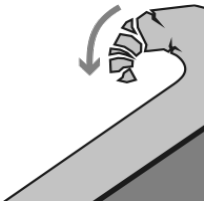
FOR PERIOD 18:00HRS Fri 29/03/2024 TO 18:00HRS Sat 30/03/2024

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Saturday 30/03/2024

Avalanche Problems

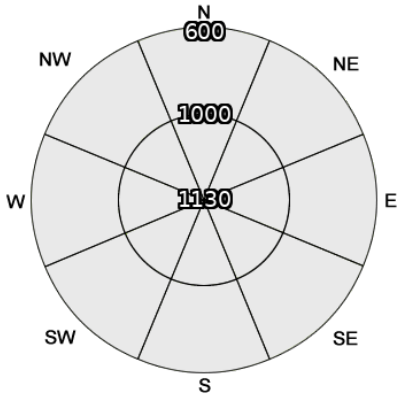
Wind Slab

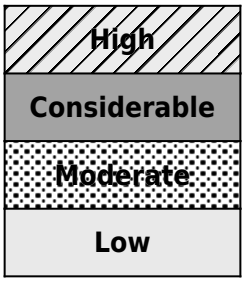


Cornices

Forecast Snow Stability & Avalanche Hazard

Good stability in most locations. A little soft, moist windslab is possible on very steep North-West to North-East aspects above 1000m but accumulations will be modest and easy to avoid. The avalanche hazard will be Low.





Forecast Weather Influences

Freezing at 1000m overnight and during the day though rising a little later. Light to moderate Southerly winds. Occasional light snow showers.

Comments

Some new well bonded windslab possible, accumulations not expected to be extensive.
