Avalanche Hazard Forecast

Issued 01/04/2024

FOR PERIOD 18:00HRS Mon 01/04/2024 TO 18:00HRS Tue 02/04/2024

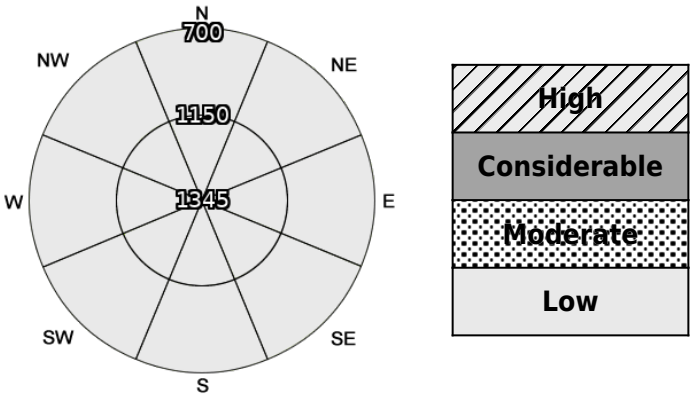
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 02/04/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will be well bonded, firm and stable in all locations. Any new summit snow deposits are not expected to be significant. Greatest accumulations will remain in North and East facing corries with reasonable cover on many aspects above 950 metres. The avalanche hazard will be Low.



Forecast Weather Influences

Scattered light showers will be rain at most levels with some summit snow. Very Strong East-North-Easterly winds will decrease in strength through the day. The freezing level will be around 1200 metres.

Comments

Snow surface is expected to be firm, with serious run outs onto rocks below many steep slopes.
