Avalanche Hazard Forecast

Issued 26/01/2024

FOR PERIOD 18:00HRS Fri 26/01/2024 TO 18:00HRS Sat 27/01/2024

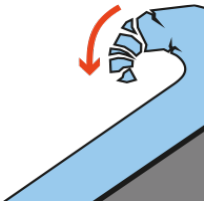
THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Saturday 27/01/2024

Avalanche Problems

Wind Slab

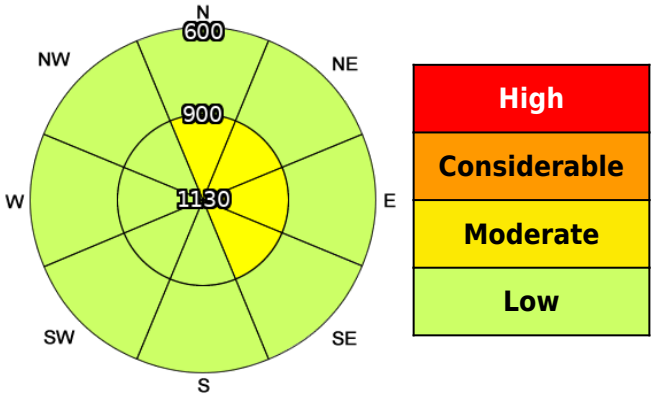
Wet Snow



Cornices

Forecast Snow Stability & Avalanche Hazard

Increased instability within the unstable snowpack is expected during Friday evening, mainly on North through East to South-East aspects above 900 meters. Areas mostly affected will be steep wind-sheltered locations such as gullies, corrie headwalls and the leeward side of ridge crests. Fragile cornices will be present above these same aspects. The snowpack will gradually consolidate and become more stable during Saturday. The avalanche hazard will be Moderate.



Forecast Weather Influences

Gale force South-Westerly winds easing slightly in the afternoon. Showers forecast throughout the day but only falling as snow on the highest tops. Freezing level rising to around 1060 meters by 8pm this evening.

Comments

Further unsettled weather ahead bringing high winds and fluctuating temperatures.
