Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Mon 29/01/2024 TO 18:00HRS Tue 30/01/2024

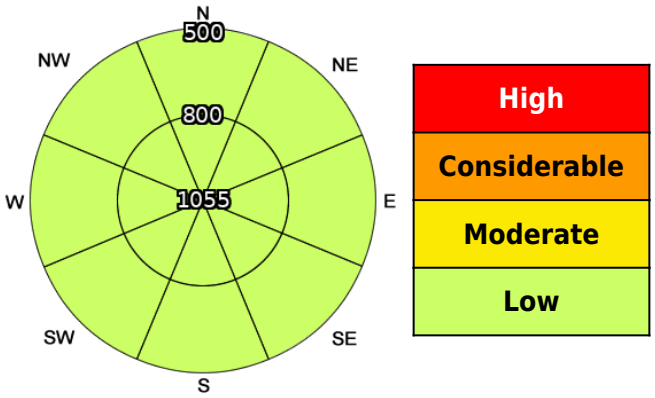
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 30/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected, the snow cover that remains mostly above 800 metres on Northerly to Easterly aspects and is confined to patches and deeper accumulations, will be firm, icy and stable. Some light precipitation may occur during the day but amounts are likely to be insignificant. The avalanche hazard will be Low.



Forecast Weather Influences

A mostly dry forecast period is expected but the odd light shower may pass through the area falling as snow above 750 metres later in the day. The South-Westerly winds, light overnight will gradually increase in strength during the day becoming strong to gale force.

Comments

All change, storm force winds and snow to 400m expected later on Wednesday.
