Southern Cairngorms

Avalanche Hazard Forecast

Issued 29/01/2024

FOR PERIOD 18:00HRS Mon 29/01/2024 TO 18:00HRS Tue 30/01/2024

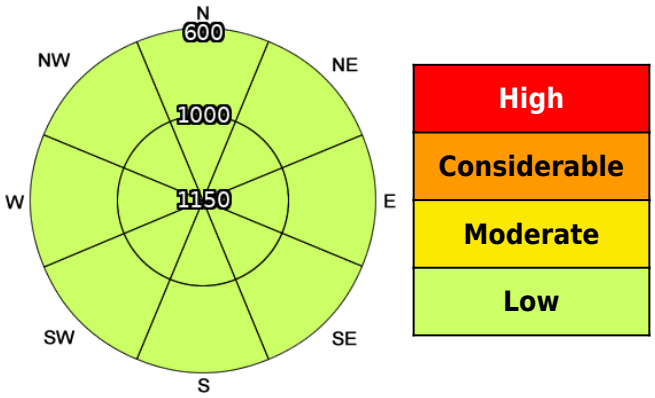
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 30/01/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snow cover will be firm and well bonded throughout. Best cover will be found above 900 metres in North and East facing corries and on higher plateau areas. The avalanche hazard will be Low.



Forecast Weather Influences

A dry day with the freezing level lifting to around 800 metres by mid morning. Light North-Westerly winds at the start of the day but backing and strengthening to become strong South-Westerlies by the afternoon.

Comments

Very firm and icy in some locations with short run outs onto rocks. Slips or trips may have serious consequences.
