Southern Cairngorms

Avalanche Hazard Forecast

Issued 12/04/2024

FOR PERIOD 18:00HRS Fri 12/04/2024 TO 18:00HRS Sat 13/04/2024

THE AVALANCHE HAZARD WILL BE LOW

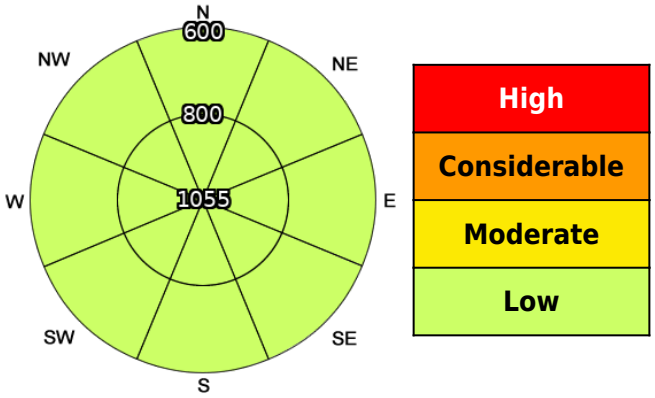
Avalanche Hazard Forecast for Saturday 13/04/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

The snowpack will initially be soft and well bonded. New windslab will develop later on North through East to South-East aspects in wind sheltered corrie rims and gully tops above 900 metres. New accumulations will be isolated in distribution and generally avoidable. Older snow will become firm. The avalanche hazard will be Low.



Forecast Weather Influences

Light rain in the morning but will turn to snow in the afternoon as the freezing level drops. Strong South-Westerly winds will slowly veer to the West by the end of the day.

Comments

Becoming cooler over the weekend. Old snow will become very firm.
