Avalanche Hazard Forecast

Issued 05/02/2024

FOR PERIOD 18:00HRS Mon 05/02/2024 TO 18:00HRS Tue 06/02/2024

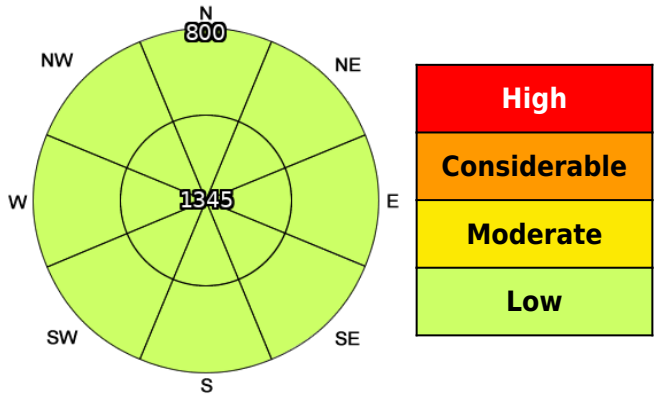
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 06/02/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The existing snowpack will begin to refreeze as the temperature drops and be well bonded and stable throughout. New snow deposits are not expected to be significant. The avalanche hazard will be Low.



Forecast Weather Influences

Showers turning to snow as they clear during the night leaving a mainly dry day with only an occasional shower of snow above 400 metres. The freezing level will fall to around 600 metres. Strong, predominately Westerly, winds.

Comments

Colder conditions forecast for the next few days. The snowpack will become firm, a slip would have very serious consequences with run outs onto rocks below steep slopes.
