Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Mon 05/02/2024 TO 18:00HRS Tue 06/02/2024

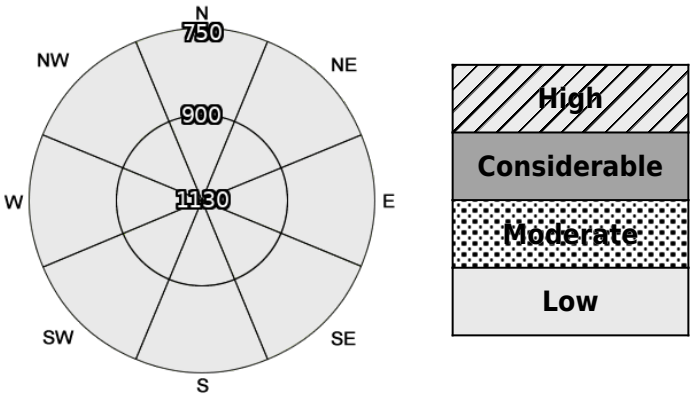
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 06/02/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The snowpack will continue to consolidate and will be generally well bonded and stable. Some deposits of new snow will develop on North-East through East to South-East aspects above 900 metres. Accumulations are not expected to be significant. The avalanche hazard will be Low.



Forecast Weather Influences

Rain will turn to light snow overnight and then give way to a mostly dry day. The freezing level will steadily drop to around 500 metres by the end of the forecast period. Strong to Gale force winds will be mainly from the West.

Comments

Welcome return to colder temperatures with the older snow becoming firm and icy.
