Avalanche Hazard Forecast

Issued 07/02/2024

FOR PERIOD 18:00HRS Wed 07/02/2024 TO 18:00HRS Thu 08/02/2024

THE AVALANCHE HAZARD WILL BE LOW

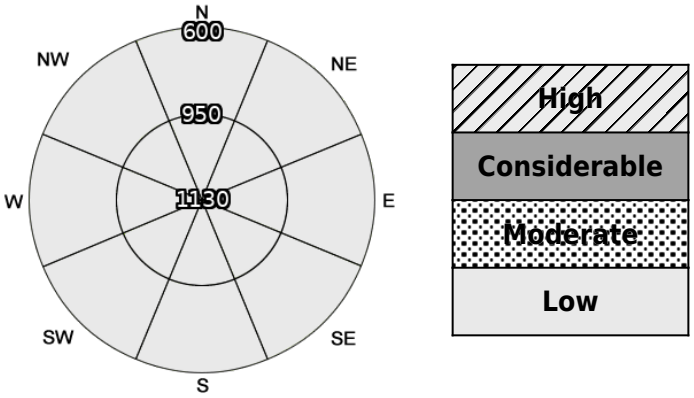
Avalanche Hazard Forecast for Thursday 08/02/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Good stability in most locations. Thin, localised, weaker windslab will be present on some North-East to South-East aspects during the morning but only above 1000m. Wind scouring expected in these locations later. A little new windslab is possible by the end of the day on a few steep West aspects above 950m. The avalanche hazard will be Low



Forecast Weather Influences

Remaining very cold. No precipitation is forecast. Light West winds becoming Easterly by morning and increasing progressively to strong by the end of the day.

Comments

Good snow ice but only on N to SE aspects above circa 800m. Serious runouts into rocks in some places.
