Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Sun 18/02/2024 TO 18:00HRS Mon 19/02/2024

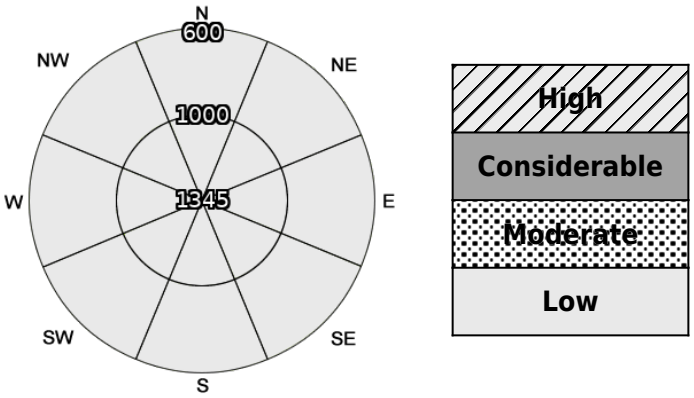
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Monday 19/02/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Stability in the existing snowpack will remain good and the snowpack surface will become firm above 1000 metres. New snow amounts are not expected to be significant and any fresh windslab accumulations, mainly on North to East aspects above 1000 metres, will be isolated and shallow. The avalanche hazard will be Low.



Forecast Weather Influences

Strong South-South-West veering West-South-Westerly winds. Overnight rain will fall as snow only on the highest summits followed by occasional showers falling as snow above 900 metres. The freezing level will drop to around 1000 metres.

Comments

Fluctuating temperatures will bring some snow and rain over the next few days with colder conditions expected later in the week.
