Torridon

Avalanche Hazard Forecast

Issued 22/02/2024

FOR PERIOD 18:00HRS Thu 22/02/2024 TO 18:00HRS Fri 23/02/2024

THE AVALANCHE HAZARD WILL BE LOW

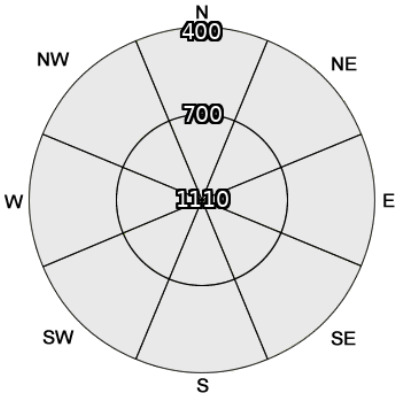
Avalanche Hazard Forecast for Friday 23/02/2024

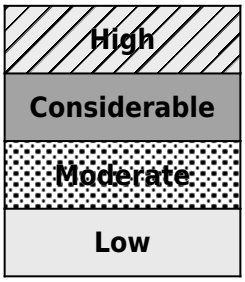
Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

There will be a thin covering of soft snow on all aspects above around 400 metres. Isolated and shallow accumulations of unstable windslab will continue to develop mainly on North to East aspects above 700 metres. Locations where this overlies the patchy older snow, such as gully tops, corrie rims and ridge flanks, will be most affected. The patchy old snow will be firm and stable. The avalanche hazard will be Low.





Forecast Weather Influences

There will be fresh South-Westerly winds and snow showers. The freezing level will be around 500 metres.

Comments

Remaining cool through the weekend with only isolated showers.
