Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Tue 27/02/2024 TO 18:00HRS Wed 28/02/2024

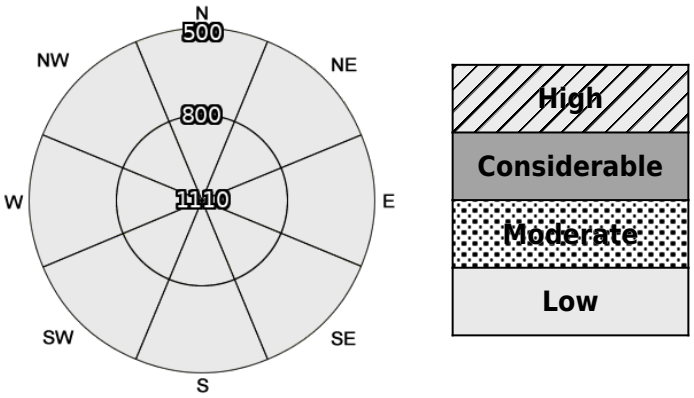
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 28/02/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

Little change is expected. The remaining snow will be confined to steep North through East to South-East aspects above 800 meters. The snowpack will continue to consolidate and is expected to be generally stable. The avalanche hazard will be Low.



Forecast Weather Influences

Strong to Gale force South-Westerly winds. Light rain showers falling as snow only on the highest summits in the morning. The freezing level will be around 900 meters overnight rising to well above summit level during the day.

Comments

Colder conditions returning on Thursday bringing further snow showers.
