Avalanche Hazard Forecast

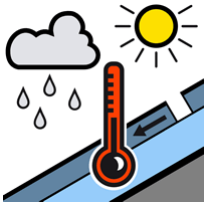
Issued 14/03/2016

FOR PERIOD 18:00HRS Mon 14/03/2016 TO 18:00HRS Tue 15/03/2016

THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Tuesday 15/03/2016

Avalanche Problems

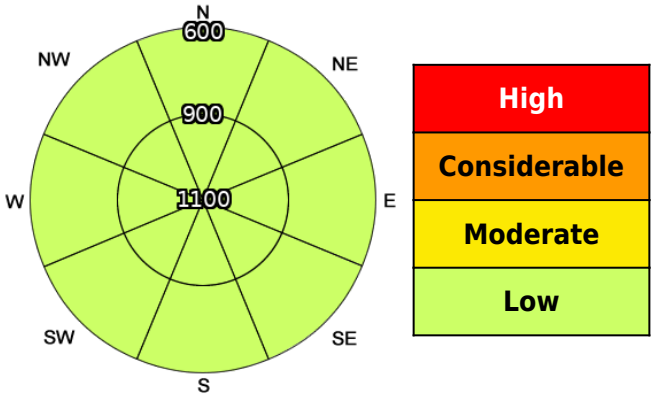


Wet Snow

Cornices

Forecast Snow Stability & Avalanche Hazard

Snow stability will be generally good as the snowpack continues to consolidate at all levels. Localised wet snow surface instabilities will exist above 900 metres on steep North through East to South-East aspects, most notably on East to South-East aspects exposed to solar radiation. Cornices above these aspects in particular remain suspect. The avalanche hazard will be Low



Forecast Weather Influences

High pressure will maintain dry and settled conditions. Freezing levels remaining well above summits. Cooler in valley floors overnight due to temperature inversion. Winds will be generally Easterly light to fresh.

Comments

Fine spring weather. Reasonable snow cover still in place in high plateau areas.
