Avalanche Hazard Forecast

Issued 27/02/2024

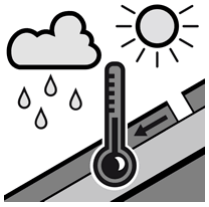
FOR PERIOD 18:00HRS Tue 27/02/2024 TO 18:00HRS Wed 28/02/2024

THE AVALANCHE HAZARD WILL BE MODERATE

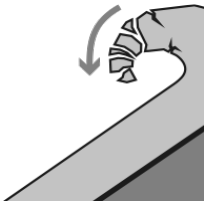
Avalanche Hazard Forecast for Wednesday 28/02/2024

Avalanche Problems

Wind Slab



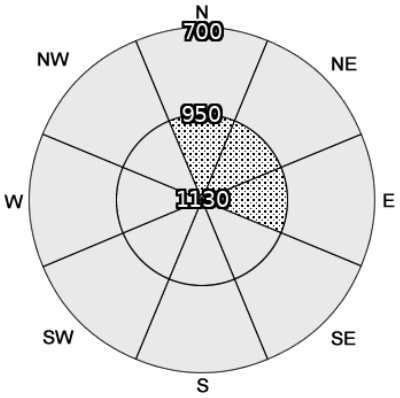
Wet Snow



Cornices

Forecast Snow Stability & Avalanche Hazard

Some additional weak windslab on steep North to East aspects above 950 metres. Period of poor stability here during the morning and early afternoon after a temperature spike and light rainfall. Cornices over these locations, some large, will become weak and prone to sudden collapse. Much better stability at lower altitudes and on other aspects. The avalanche hazard will be Moderate.



Forecast Weather Influences

A few overnight snow showers then dry. Light snow recommencing during the morning turning to light rain by afternoon. Cold initially, but much milder later. Strong West-South-Westerly winds, becoming very strong Southerly by afternoon.

Comments

Weak cornices, some large, prone to sudden collapse, over many lee slopes.
