Avalanche Hazard Forecast

Issued 02/03/2024

FOR PERIOD 18:00HRS Sat 02/03/2024 TO 18:00HRS Sun 03/03/2024

THE AVALANCHE HAZARD WILL BE MODERATE

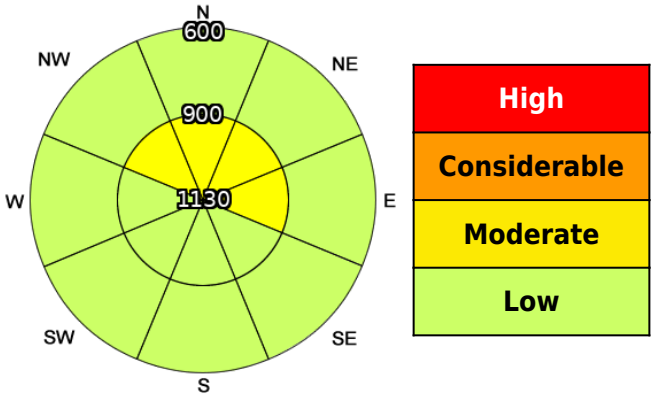
Avalanche Hazard Forecast for Sunday 03/03/2024

Avalanche Problems

Wind Slab

Forecast Snow Stability & Avalanche Hazard

Some drifting and redistribution of snow will take place with localised areas of unstable windslab developing on mostly North-West through North to Easterly aspects above 900 metres, with steep wind sheltered locations such as coire rims and gully tops most affected. Elsewhere, although the snowpack is soft, stability will be generally good. Cornices overhanging same aspects remain fragile. The avalanche hazard will be Moderate



Forecast Weather Influences

The freezing level will be around 600 metres overnight rising to 700 metres in the afternoon. Winds will be fresh to strong Easterly veering South-South -Easterly by the end of the day. Some light snow showers overnight, then a dry day expected

Comments

Remaining wintry.
