Northern Cairngorms

Avalanche Hazard Forecast

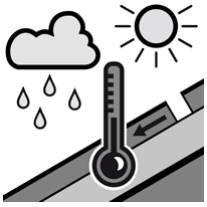
Issued 10/04/2016

FOR PERIOD 18:00HRS Sun 10/04/2016 TO 18:00HRS Mon 11/04/2016

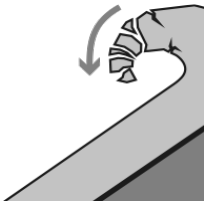
THE AVALANCHE HAZARD WILL BE MODERATE

Avalanche Hazard Forecast for Monday 11/04/2016

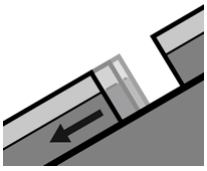
Avalanche Problems



Wet Snow



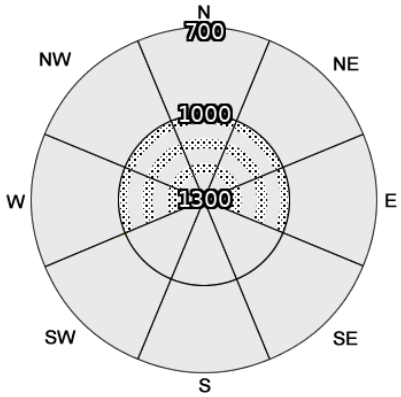
Cornices

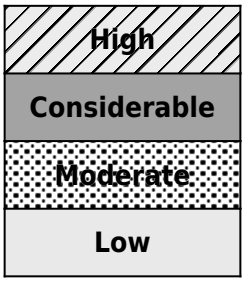


Gliding Snow

Forecast Snow Stability & Avalanche Hazard

The snowpack will thaw at all levels with instabilities affecting areas of steep and convex terrain especially on West through North to North-Easterly aspects above 1000 metres. Surface instabilities will affect many steep and sun exposed slopes. Cornices will be prone to collapse. Glide cracks will continue to widen on East aspects. Elsewhere the snowpack will be soft but generally stable. The avalanche hazard will be Moderate





Forecast Weather Influences

Dry conditions are expected with long spells of sunshine during the day. Moderate to strong East-South-East winds will back to the East. The freezing level will be above the summits.

Comments

Plenty of sunshine expected tomorrow especially during the morning.
