Avalanche Hazard Forecast

FOR PERIOD 18:00HRS Tue 05/03/2024 TO 18:00HRS Wed 06/03/2024

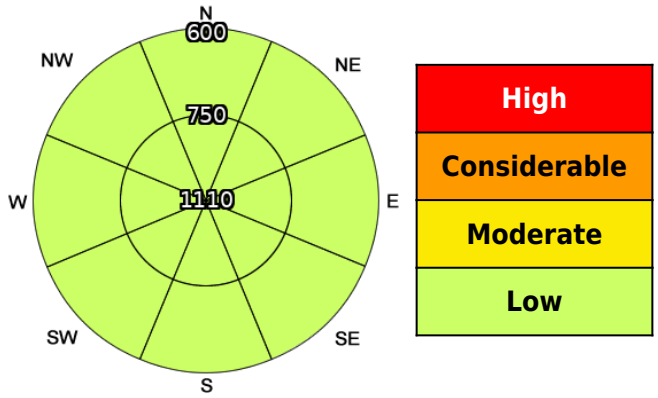
THE AVALANCHE HAZARD WILL BE LOW

Avalanche Hazard Forecast for Wednesday 06/03/2024

Avalanche Problems

Forecast Snow Stability & Avalanche Hazard

The remaining snow cover will be mostly firm and generally stable in all locations. Greatest snow amounts will be found above 800 metres on steep North through East to South-East aspects, although this will be mainly thin and superficial. The avalanche hazard will be Low.



Forecast Weather Influences

A dry day is expected with the freezing level around the summits. Very strong South-Easterly winds will ease overnight to become moderate to strong.

Comments

Little change is expected with the dry conditions set to continue.
